

What to expect on the day

MOTH CONTROL TREATMENT

PREPARING FOR YOUR TREATMENT

- Please provide suitable access to the property and to areas that are to be treated.
- Please inform us of any parking restrictions that may impact our access on the day.
- Make sure that floors to be treated are clear of small items, books, shoes etc.
- Remove any fragile items from the surfaces of furniture in rooms that are to be treated.
- Remove all items from under beds.
- Disconnect electrical appliances in areas to be treated.
- Remove items vulnerable to water damage.
- Remove or protect fish tanks / aquariums of any kind.
- Ensure pets are not able to access areas being treated.

DO I HAVE TO VACATE THE PROPERTY?

- Depending on the treatment needed and the layout of the property, you may be required to vacate the property at some point. However, in most cases it is perfectly safe for people to be in areas of the house that are not being treated whilst the treatment is in progress. Please discuss access needed in advance, so that we can plan the treatment according to this, if required.
- Fumigated spaces will be inaccessible for minimum 1hr following treatment.

IS THE TREATMENT SAFE FOR MY CHILDREN & PETS ?

- All the products we use are HSE approved for use in a domestic environment. We use products according to the statutory regulations and within the best practice guidelines of CoSHH (Control of Substances Hazardous to Health). Therefore, once carpets are dry, they are safe to be used by people and pets.
- Rooms are safe to access a minimum of 1 hour after fogging.
- Pets and people must not access spaces until floor is COMPLETELY dry (min 4hrs) after insecticide treatment.

TREATMENT OF CLOTHES

- There is no insecticide that is safe or practical to use on clothing, and our normal treatment does not include this. We offer a separate service for this - treating vulnerable clothing with heat. Please see our [website](#) for more information.
- For more information on protecting and storing clothes, please visit our [website](#).

PAYMENT

- We will email your invoice on completion of the treatment. We do ask that you make your payment on the day of the treatment. This can be paid direct using the online link, or via BACS, as detailed in the invoice.

Thank you for choosing Proton Environmental
